Subject: Briefing Bullets -- 04/05/13 pm

- Exxon provided the Unified Command a revised estimate of the amount of oil released on 03/29. The revised estimate is now approximately 5,000 bbl.
- The FOSC (IC) for EPA delivered a Section 308 Request for Information to the Exxon IC, requesting additional information about the nature of the material released on 03/29.
- EPA, ADH, and Exxon met to discuss the re-entry process and monitoring objectives. A fact sheet for resident re-entry is being drafted for unified command review.
- At the request of the unified command, EPA worked with CTEH and ADH to set up an air monitor inside the local elementary school that will run continuous air monitoring on school days from 6:30 am to 6:30 pm.
- Approximately 23,267 bbl oil/water mixture collected to date; Approximately 611 total personnel on response
- EPA/START collected samples from the pipeline at two locations (the pipeline break, and the Conway Pump Station). The samples will be sent to two labs for full analysis and fingerprinting.

Faithfully yours,

Steve Mason
